

John Howard Society – HIPP Program:

YouthREX Youth Programs Supports (YPS) Data Report – July 2018

By James Borland, PhD

How did We Compile This Data?

The purpose of this report is to provide the John Howard Society, and specifically the HIPP program, with insights about the population distribution of Black youth living across the city of Toronto. HIPP is an African-Caribbean youth-centred program for youth between the ages of 12-17 that proactively strives to resolve programs of youth violence in neighbourhoods and communities. HIPP seeks to provide solutions to these programs by helping its program participants build the skills they need to reach their educational, employment and personal goals (K. Williams, personal communication, May 3, 2018). Black youth population statistics were cartographically mapped across the city of Toronto, by city defined neighbourhoods and correlated to existing social services agencies that provide Black-led or Black-focussed youth programs

Population statistics displayed in this report have been drawn from the 2016 Statistics Canada Census, and compiled to fit City of Toronto defined [neighbourhoods](#). Geographic maps display data in coloured shapes for individual [2016 Statistics Canada census tracts](#). The maps display census counts by quartiles. Quartiles divide a range of data such as the ages of a specific population like into four equal parts. The relationship between quartiles and percentiles is that the 25% quartile corresponds to the 25th percentile. The 50% quartile represents the median value in the data set.

Definitions of Key Terms

Key terms drawn from Statistics Canada are hyperlinked in blue font type within the data table captions to the [2016 Statistics Canada Census dictionary](#). Simply click on the hyperlink to open a browser to the specific dictionary definition.

Key Highlights

- In 2016, Black youth age 15-29 predominantly resided across Toronto, in the North East corner of the city in the upper half of the former municipality of Etobicoke, as well as the Northwest corner of the former municipality of Scarborough.
- While a significant number of downtown Toronto neighbourhoods are identified as areas with some of the lowest numbers of Black youth age 15-29, the neighbourhoods of Moss Park and Regent Park, represent an exception indicating that these neighbourhoods have some of the highest number of Black youth age 15-19, residing in these two areas.
- While some social services that provide programs for Black youth are located in the Northwest and Northeast corners of Toronto where many Black youth reside, almost half of such service organizations are located in downtown neighbourhoods where the lowest numbers of Black youth live.

Total Black Youth Age 15-29 Residing in Toronto Neighbourhoods

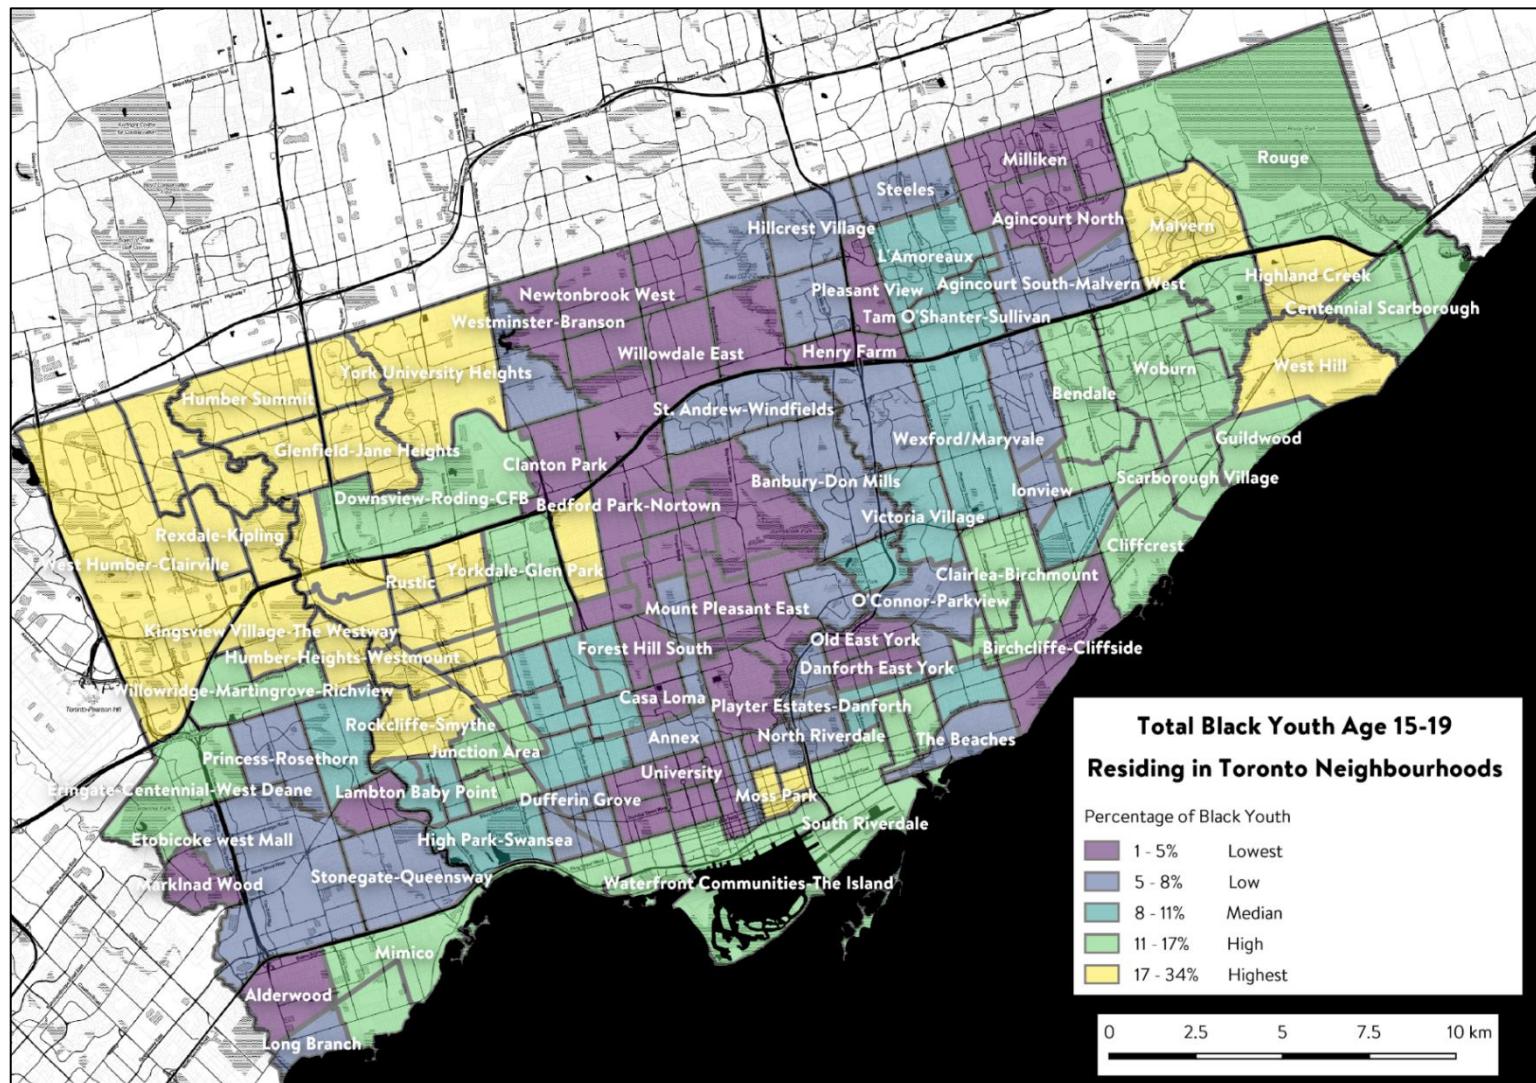

Figure 1: Total Black youth age 15-19 residing in the city of Toronto. Data visualization indicates that the highest number of Black youth age 15-19 reside in the (a) North-West neighbourhoods of Kingsview Village-The Westway and Rexdale-Kipling; (b) the uptown neighbourhoods of Jane and Finch; (c) the midtown neighbourhoods Rockcliffe-Smythe, Mount Dennis and Weston; (d) North-East neighbourhoods of Malvern, Highland Creek and West Hill; and (e) the downtown neighbourhoods of Moss Park and Regent Park. Data drawn from the 2016 Statistics Canada Census. Data calculated to fit Toronto neighbourhoods by James Borland, YouthREX, York University, Toronto, Ontario, Canada.

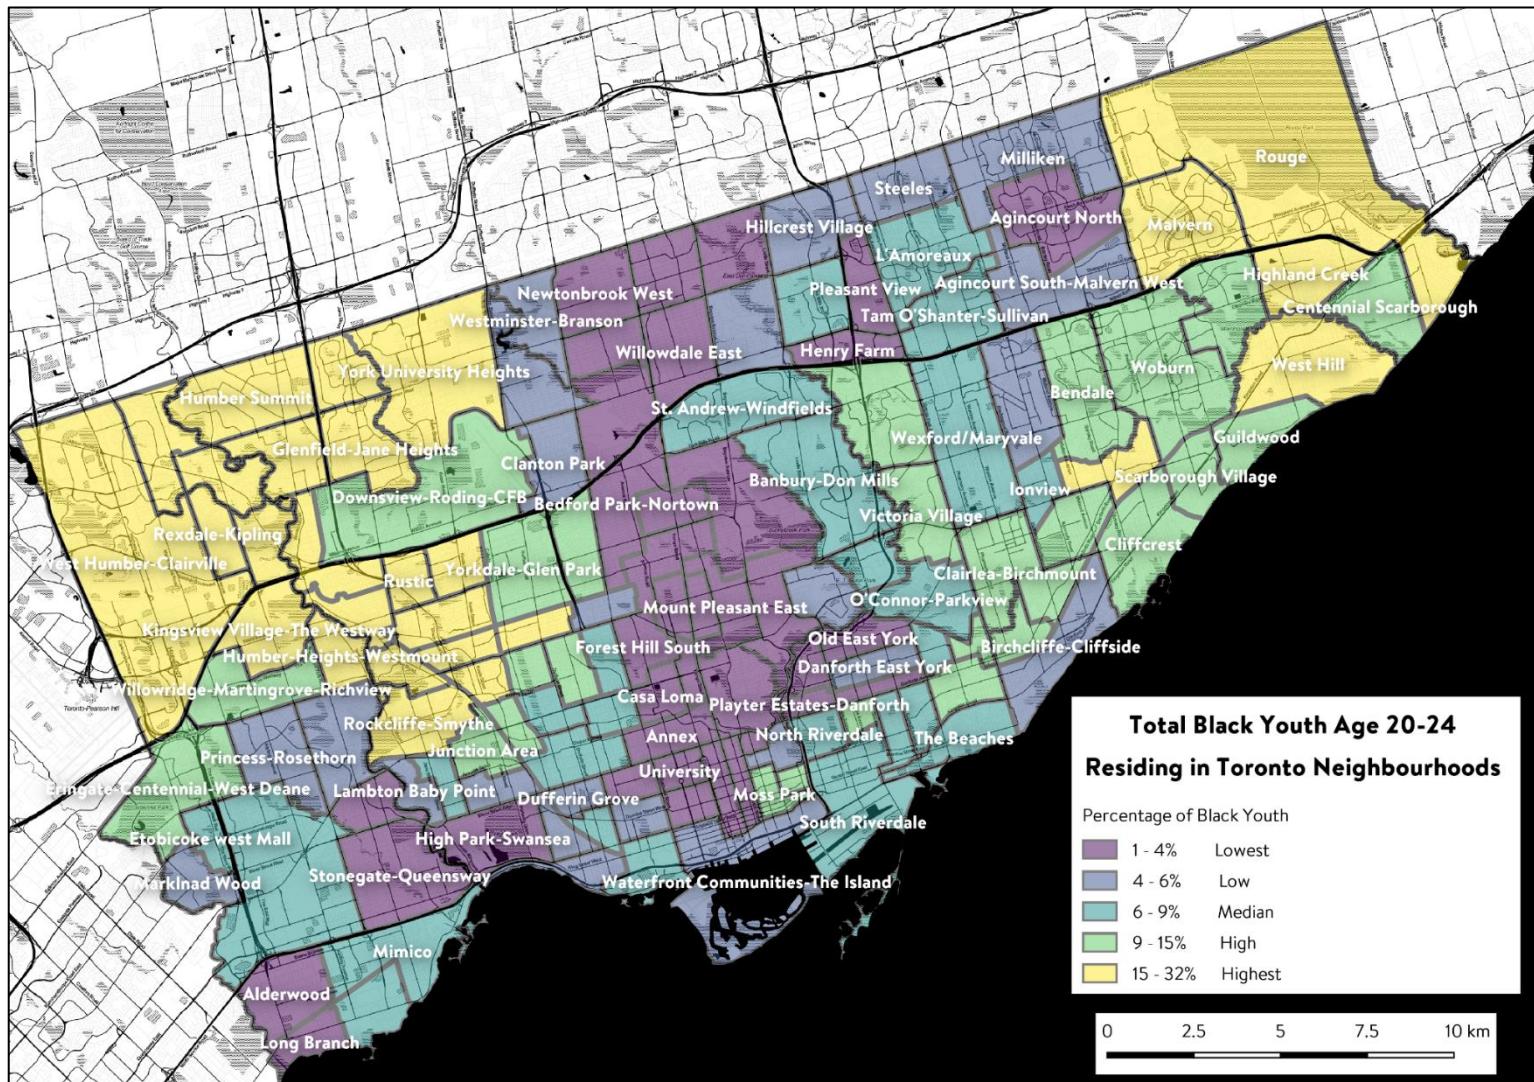

Figure 2: Total Black youth age 20-24 residing in the city of Toronto. Data visualization indicates that the highest number of Black youth age 20-24 reside in the (a) North-West neighbourhoods of Kingsview Village-The Westway and Rexdale-Kipling; (b) the uptown neighbourhoods of Jane and Finch; (c) the midtown neighbourhoods Rockcliffe-Smythe, Mount Dennis and Weston; (d) North-East neighbourhoods of Eglinton East, Malvern, Highland Creek and West Hill. Data drawn from the 2016 Statistics Canada Census. Data calculated to fit Toronto neighbourhoods by James Borland, YouthREX, York University, Toronto, Ontario, Canada.

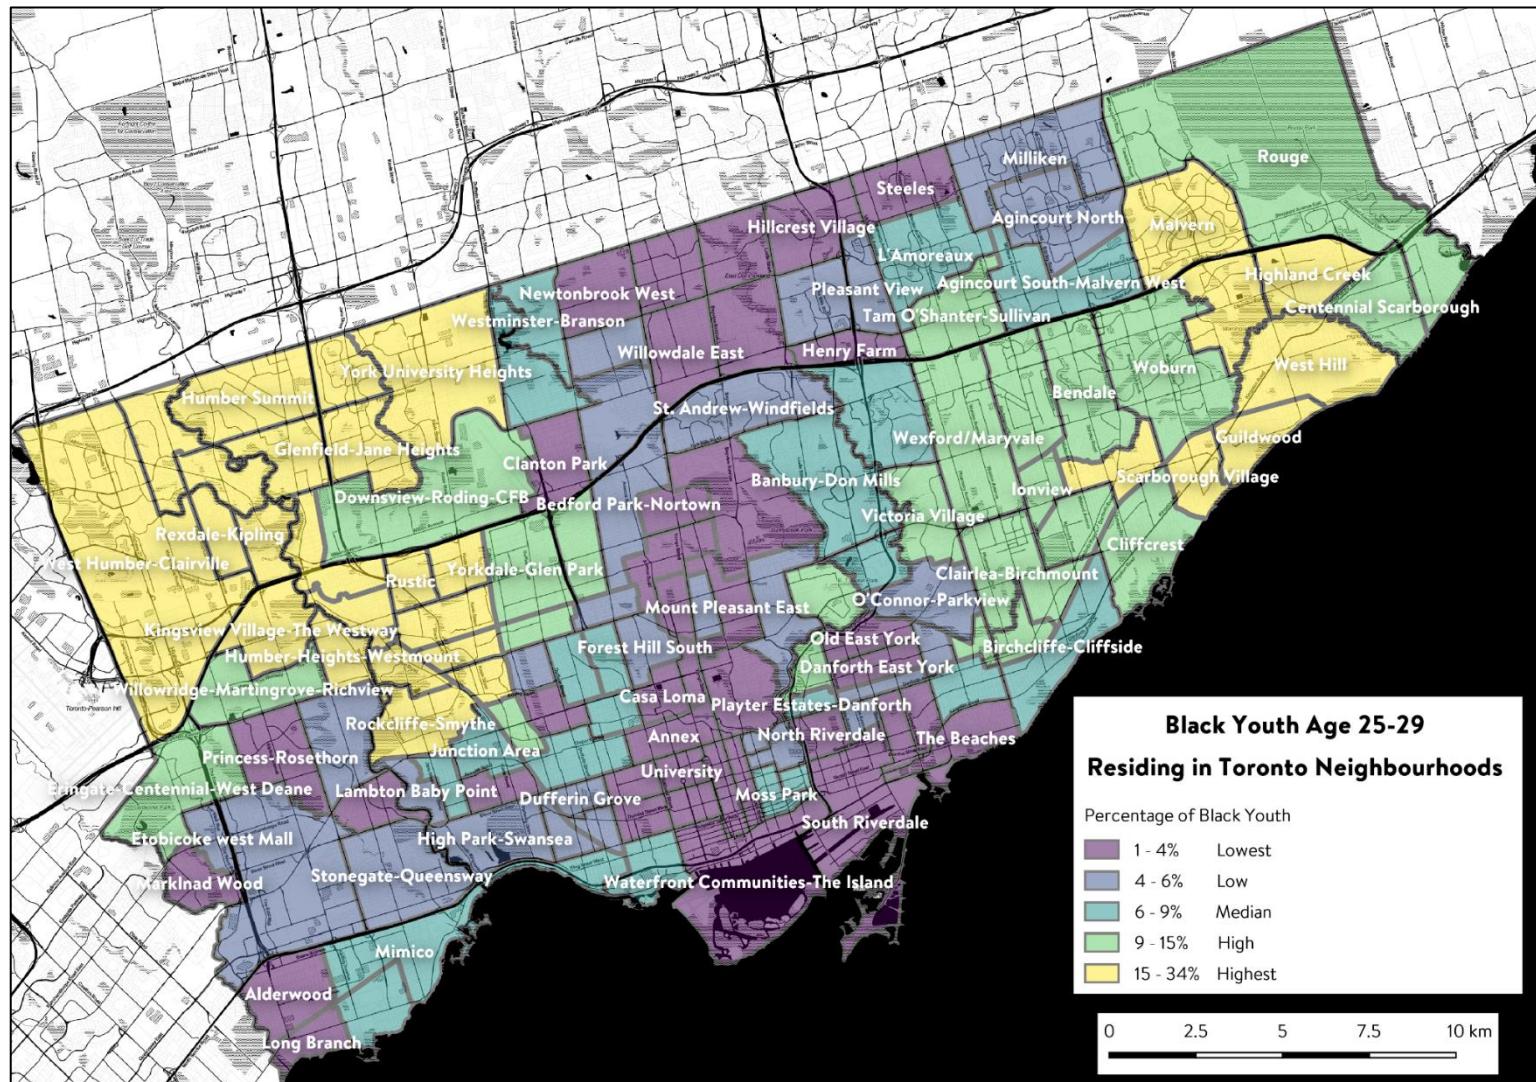

Figure 3: Total Black youth age 25-29 residing in the city of Toronto. Data visualization indicates that the highest number of Black youth age 25-29 reside in the (a) North-West neighbourhoods of Kingsview Village-The Westway and Rexdale-Kipling; (b) the uptown neighbourhoods of Jane and Finch; (c) the midtown neighbourhoods Rockcliffe-Smythe, Mount Dennis and Weston; (d) North-East neighbourhoods of Eglinton East, Malvern, Highland Creek and West Hill. It is important to note, as compared to the 15-19 age group, that for 25-29 age group the neighbourhoods of Moss and Regent Park area identified as median population areas for young Black adults. Data drawn from the 2016 Statistics Canada Census. Data calculated to fit Toronto neighbourhoods by James Borland, YouthREX, York University, Toronto, Ontario, Canada.

Data calculated to fit City of Toronto neighbourhoods by James Borland, YouthREX, York University, Toronto, Ontario, Canada.

Female Black Youth Age 15-29 Residing in Toronto Neighbourhoods

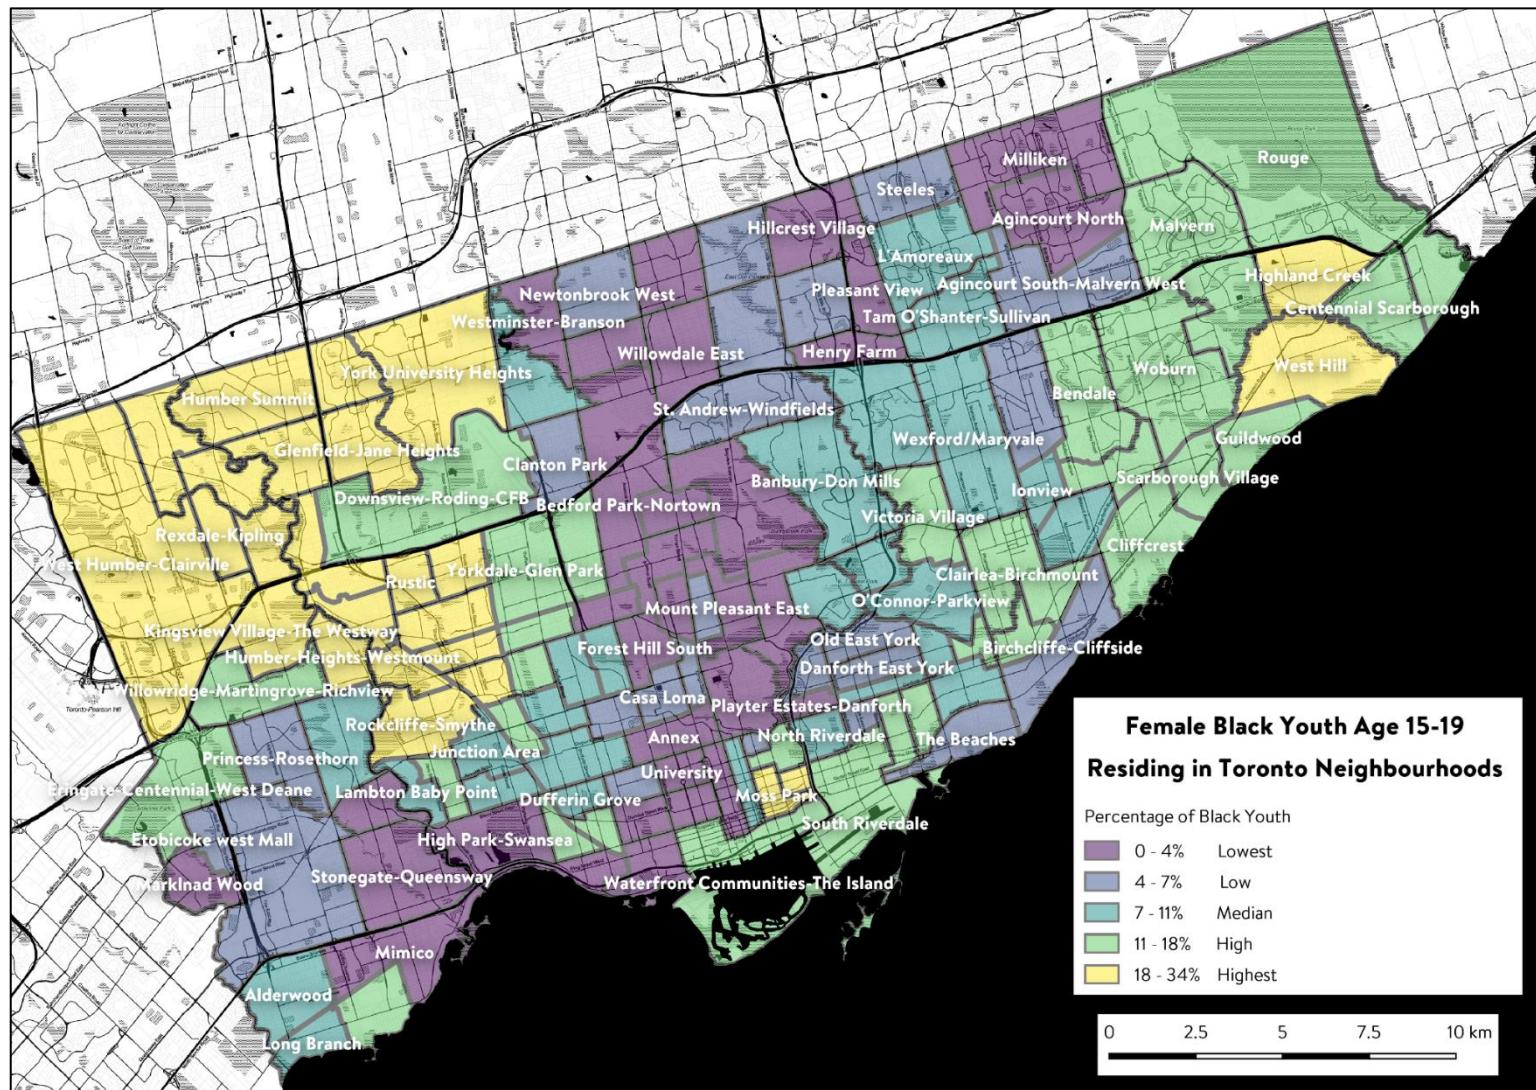

Figure 4: Female Black youth age 15-19 residing in the city of Toronto. Data visualization indicates that the highest number of female Black youth age 15-19 reside in the (a) North-West neighbourhoods of Kingsview Village-The Westway and Rexdale-Kipling areas; (b) the uptown neighbourhoods of Jane and Finch; (c) the midtown neighbourhoods Rockcliffe-Smythe, Mount Dennis and Weston; (d) North-East neighbourhoods of Highland Creek and West Hill; and (e) the downtown neighbourhoods of Moss Park and Regent Park. Data drawn from the 2016 Statistics Canada Census. Data calculated to fit Toronto neighbourhoods by James Borland, YouthREX, York University, Toronto, Ontario, Canada.

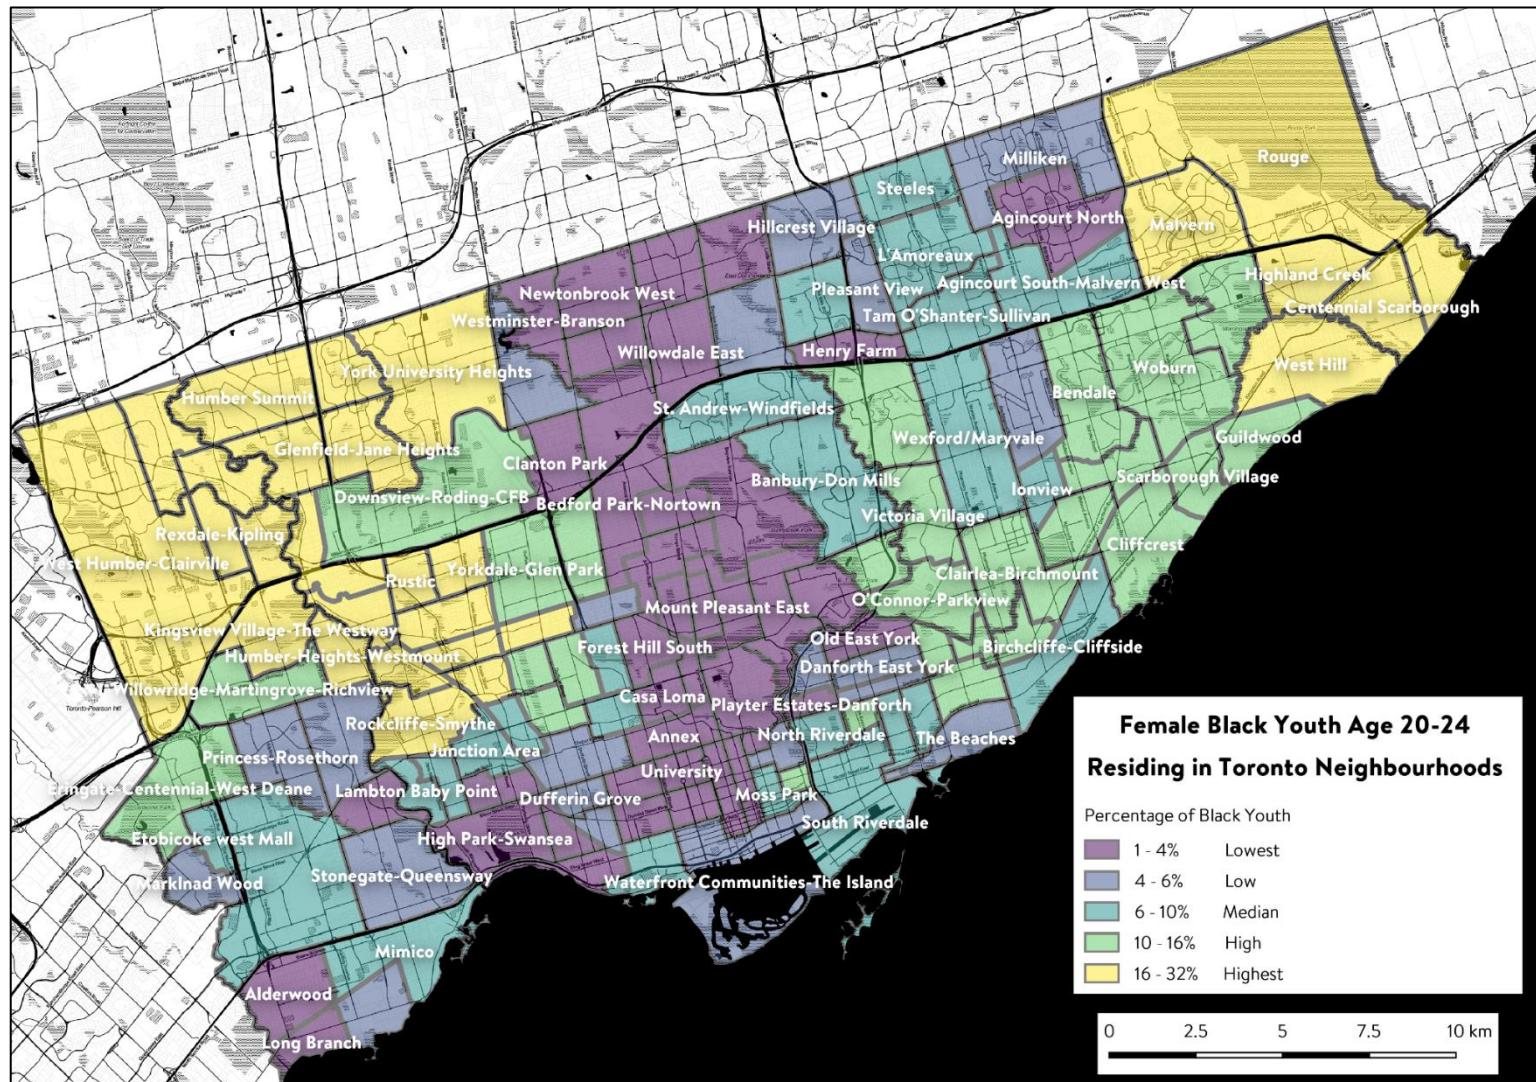

Figure 5: Female Black youth age 20-24 residing in the city of Toronto. Data visualization indicates that the highest number of female Black youth age 20-24 reside in the (a) North-West neighbourhoods of Kingsview Village-The Westway and Rexdale-Kipling; (b) the uptown neighbourhoods of Jane and Finch; (c) the midtown neighbourhoods Rockcliffe-Smythe, Mount Dennis and Weston; (d) North-East neighbourhoods of Malvern, Rouge, Highland Creek, Centennial Scarborough and West Hill. Data drawn from the 2016 Statistics Canada Census. Data calculated to fit Toronto neighbourhoods by James Borland, YouthREX, York University, Toronto, Ontario, Canada.

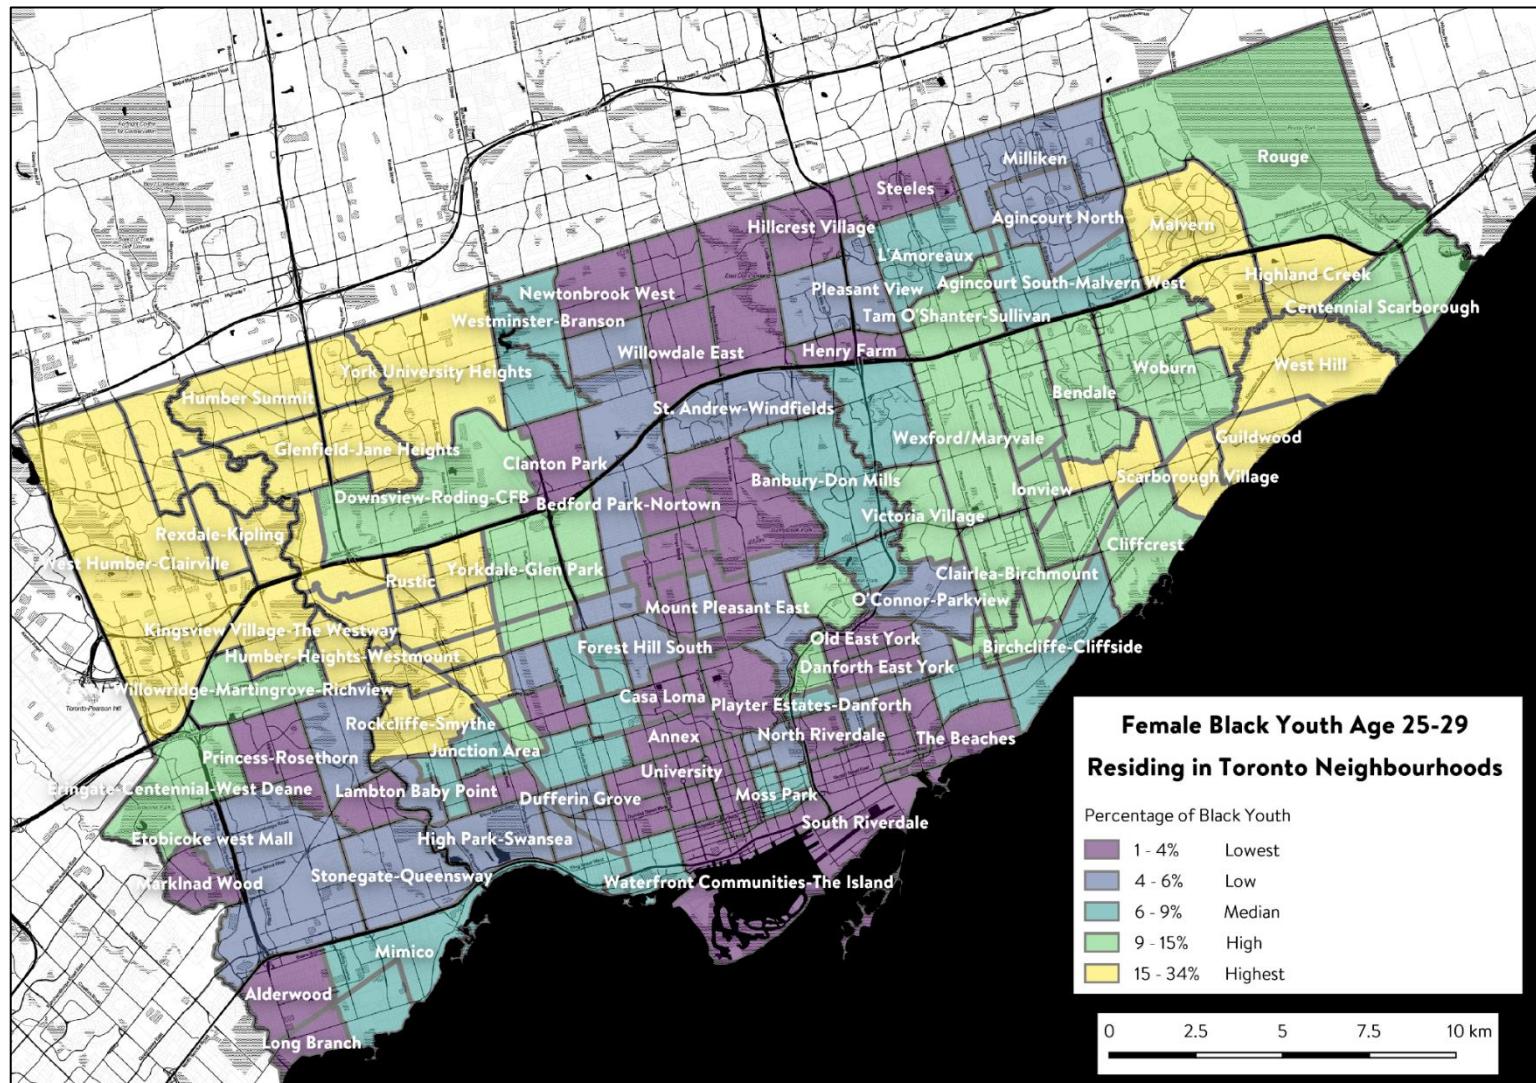

Figure 6: Female Black youth age 25-29 residing in the city of Toronto. Data visualization indicates that the highest number of female Black youth age 25-29 reside in the (a) North-West neighbourhoods of Kingsview Village-The Westway and Rexdale-Kipling; (b) the uptown neighbourhoods of Jane and Finch; (c) the midtown neighbourhoods Rockcliffe-Smythe, Mount Dennis and Weston; (d) North-East neighbourhoods of Eglinton East, Malvern, Scarborough Village, Guildwood, Highland Creek and West Hill. It is important to note, as compared to the 15-19 age group, that for 25-29 age group the neighbourhoods of Moss and Regent Park area identified as median population areas for young female Black adults. Data drawn from the 2016 Statistics Canada Census. Data calculated to fit Toronto neighbourhoods by James Borland, YouthREX, York University, Toronto, Ontario, Canada.

Table 12: Female Black youth population age 15-29 residing in City of Toronto designated neighbourhoods in the former municipality of York, as documented by the 2016 Statistics Canada Census. Data calculated to fit City of Toronto neighbourhoods by James Borland, YouthREX, York University, Toronto, Ontario, Canada.

Male Black Youth Age 15-29 Residing in Toronto Neighbourhoods

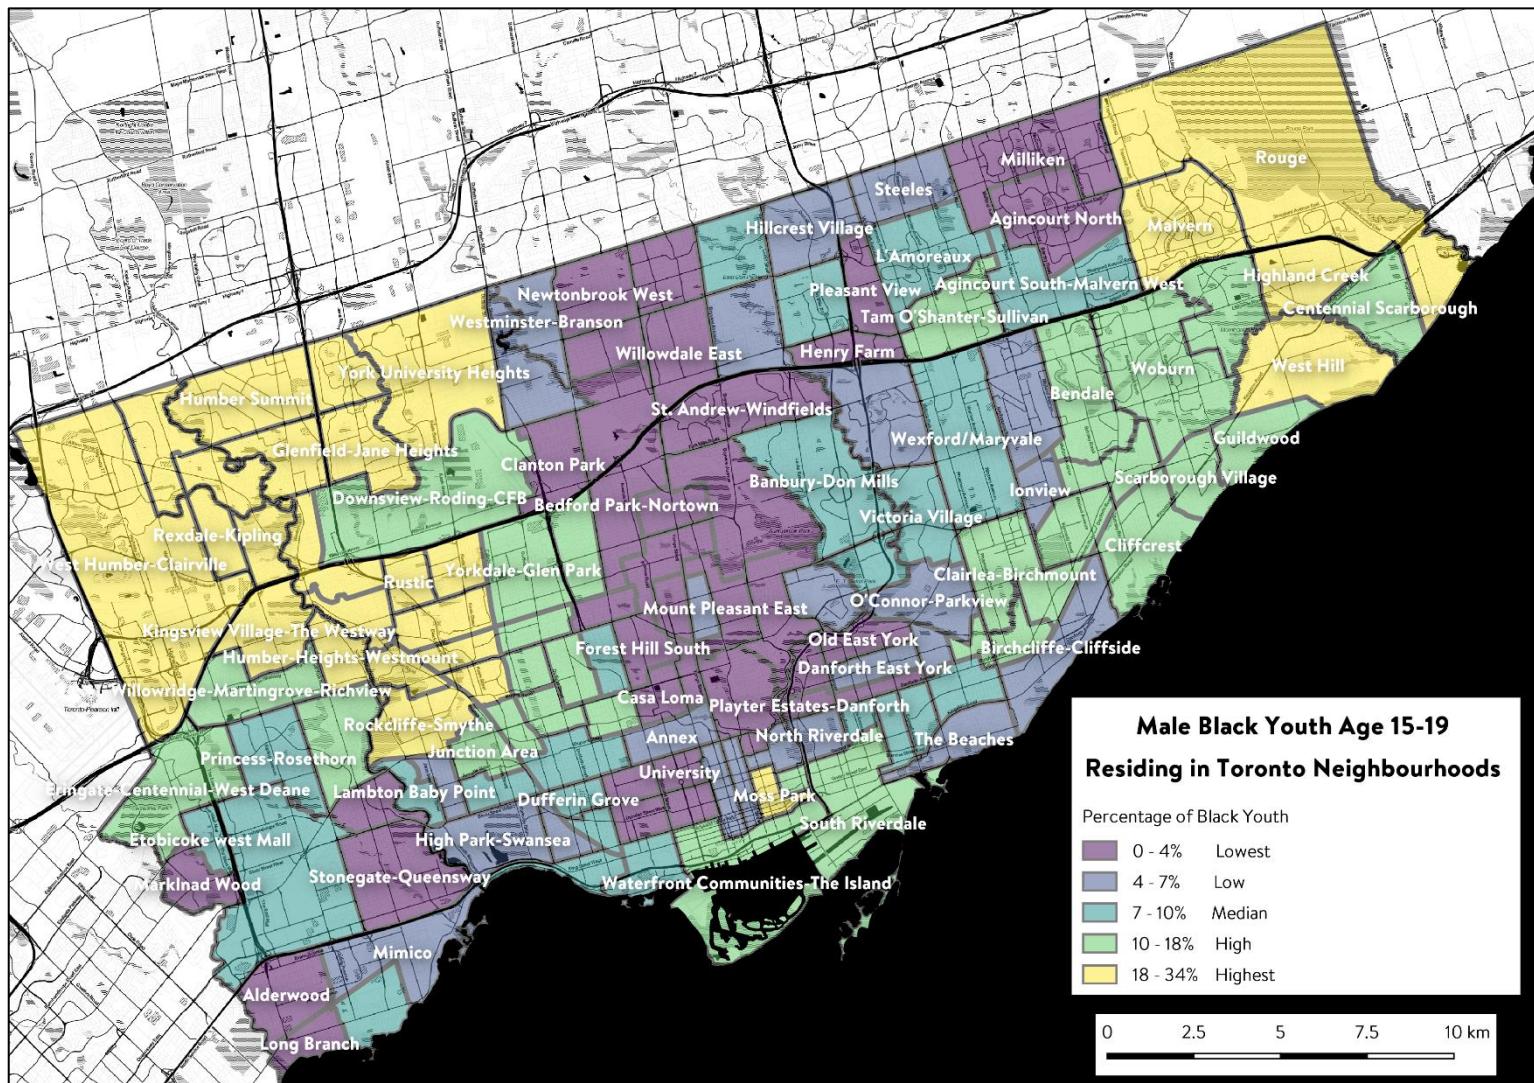

Figure 7: Male Black youth age 15-19 residing in the city of Toronto. Data visualization indicates that the highest number of male Black youth age 15-19 reside in the (a) North-West neighbourhoods of Kingsview Village-The Westway and Rexdale-Kipling areas; (b) the uptown neighbourhoods of Jane and Finch; (c) the midtown neighbourhoods Rockcliffe-Smythe, Mount Dennis and Weston; (d) North-East neighbourhoods of Malvern, Rouge, Highland Creek and West Hill; and (e) the downtown neighbourhoods of Moss Park and Regent Park. Data drawn from the 2016 Statistics Canada Census. Data calculated to fit Toronto neighbourhoods by James Borland, YouthREX, York University, Toronto, Ontario, Canada.

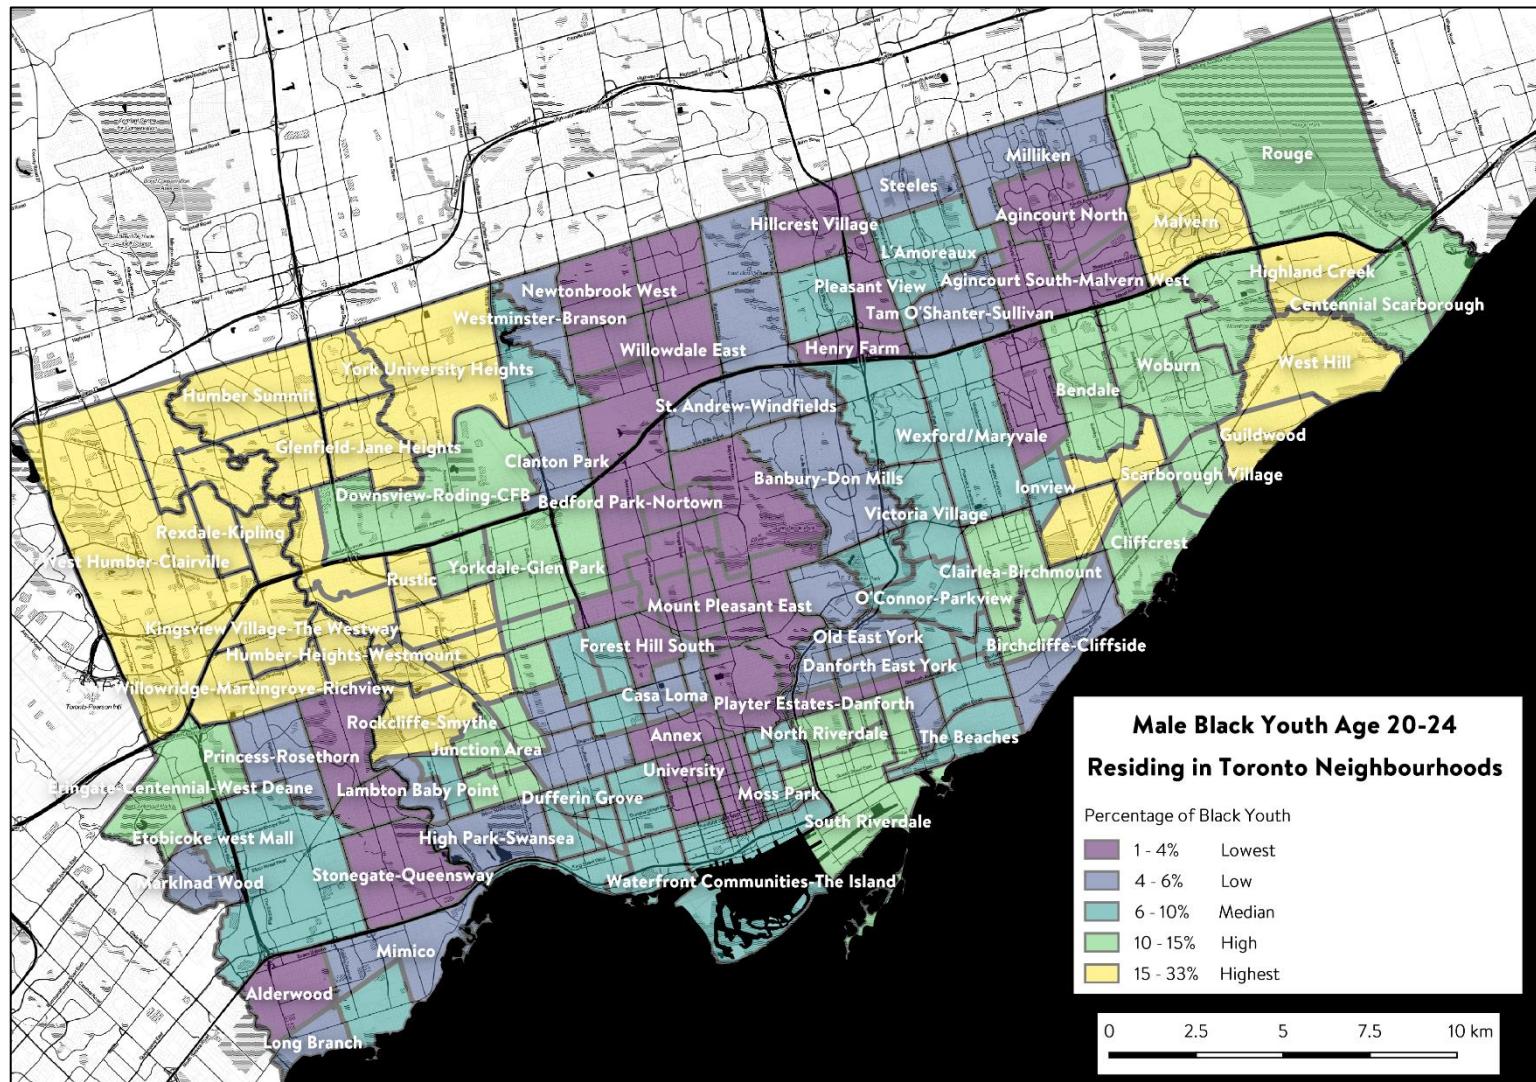

Figure 8: Male Black youth age 20-24 residing in the city of Toronto. Data visualization indicates that the highest number of male Black youth age 20-24 reside in the (a) North-West neighbourhoods of Kingsview Village-The Westway and Rexdale-Kipling; (b) the uptown neighbourhoods of Jane and Finch; (c) the midtown neighbourhoods Rockcliffe-Smythe, Mount Dennis and Weston; (d) North-East neighbourhoods of Malvern, Highland Creek, Guildwood, West Hill, Eglinton East and Kennedy Park. Data drawn from the 2016 Statistics Canada Census. Data calculated to fit Toronto neighbourhoods by James Borland, YouthREX, York University, Toronto, Ontario, Canada.

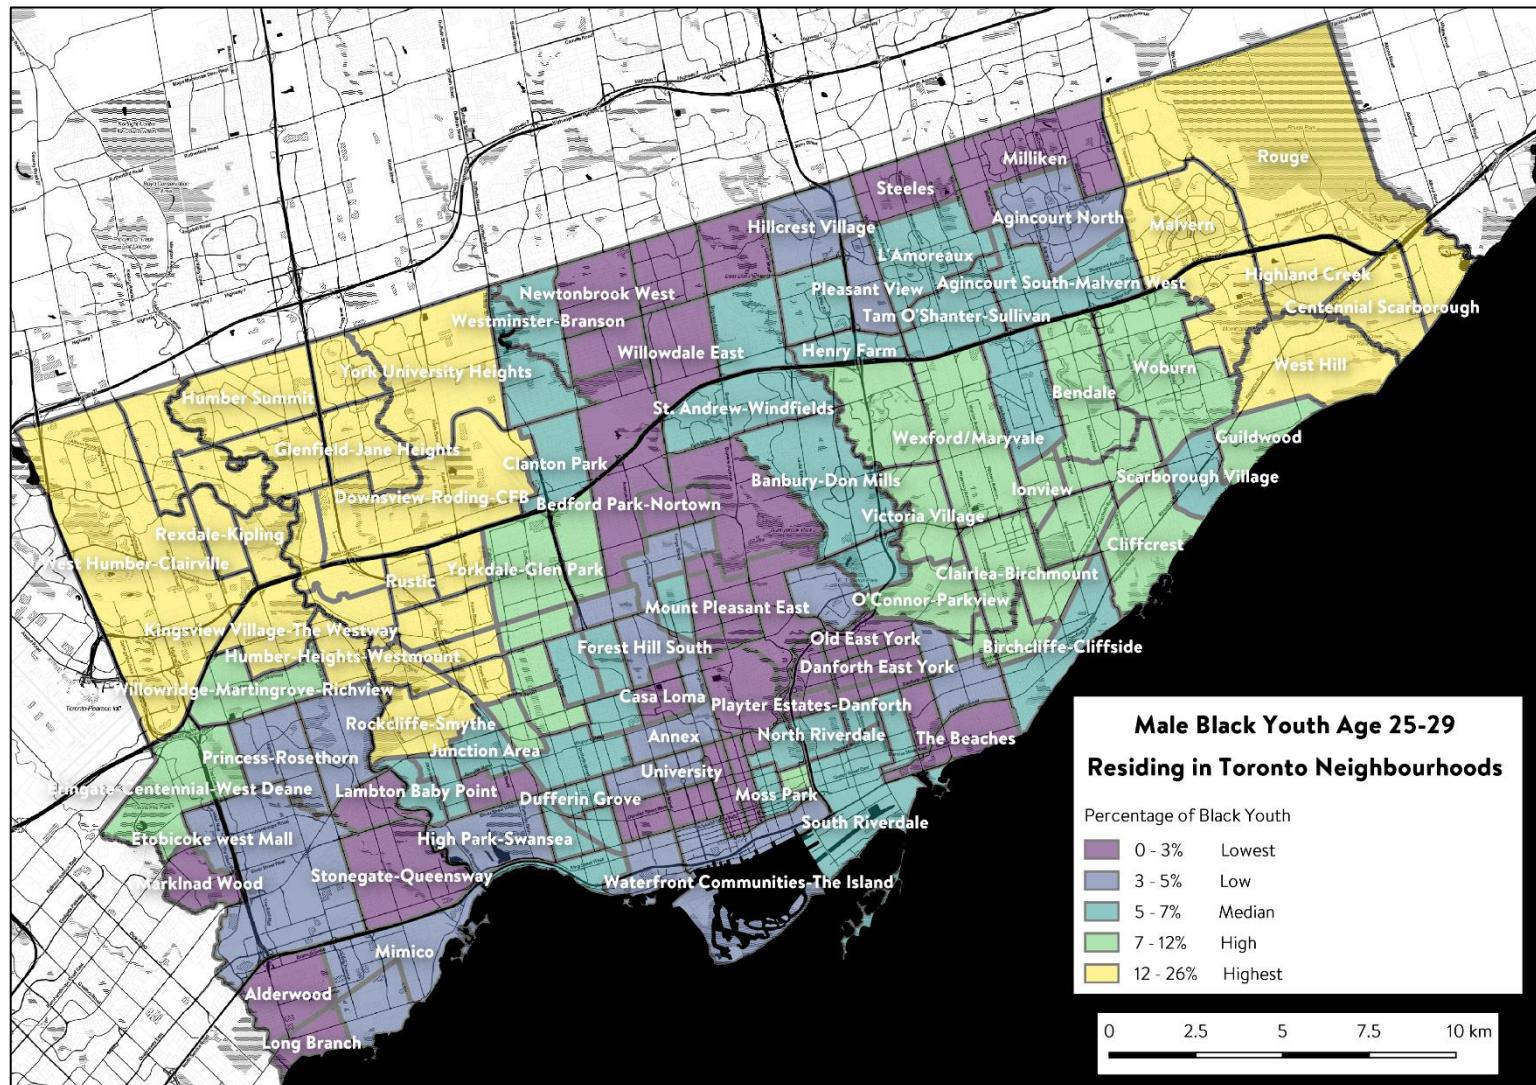

Figure 9: Male Black youth age 25-29 residing in the city of Toronto. Data visualization indicates that the highest number of male Black youth age 25-29 reside in the (a) North-West neighbourhoods of Kingsview Village-The Westway and Rexdale-Kipling; (b) the uptown neighbourhoods of Jane and Finch; (c) the midtown neighbourhoods Rockcliffe-Smythe, Mount Dennis and Weston; (d) North-East neighbourhoods of Malvern, Rouge, Morningstar, Highland Creek, Centennial Scarborough and West Hill. It is important to note, as compared to the 15-19 age group, that for 25-29 age group the neighbourhoods of Moss and Regent Park area identified as median population areas for young male Black adults. Data drawn from the 2016 Statistics Canada Census. Data calculated to fit Toronto neighbourhoods by James Borland, YouthREX, York University, Toronto, Ontario, Canada.

Table 18: Male Black youth population age 15-29 residing in City of Toronto designated neighbourhoods in the former municipality of York, as documented by the 2016 Statistics Canada Census. Data calculated to fit City of Toronto neighbourhoods by James Borland, YouthREX, York University, Toronto, Ontario, Canada.

Asset Mapping of Social Services for Black Youth & Black Youth Age 15-24 in Toronto Neighbourhoods

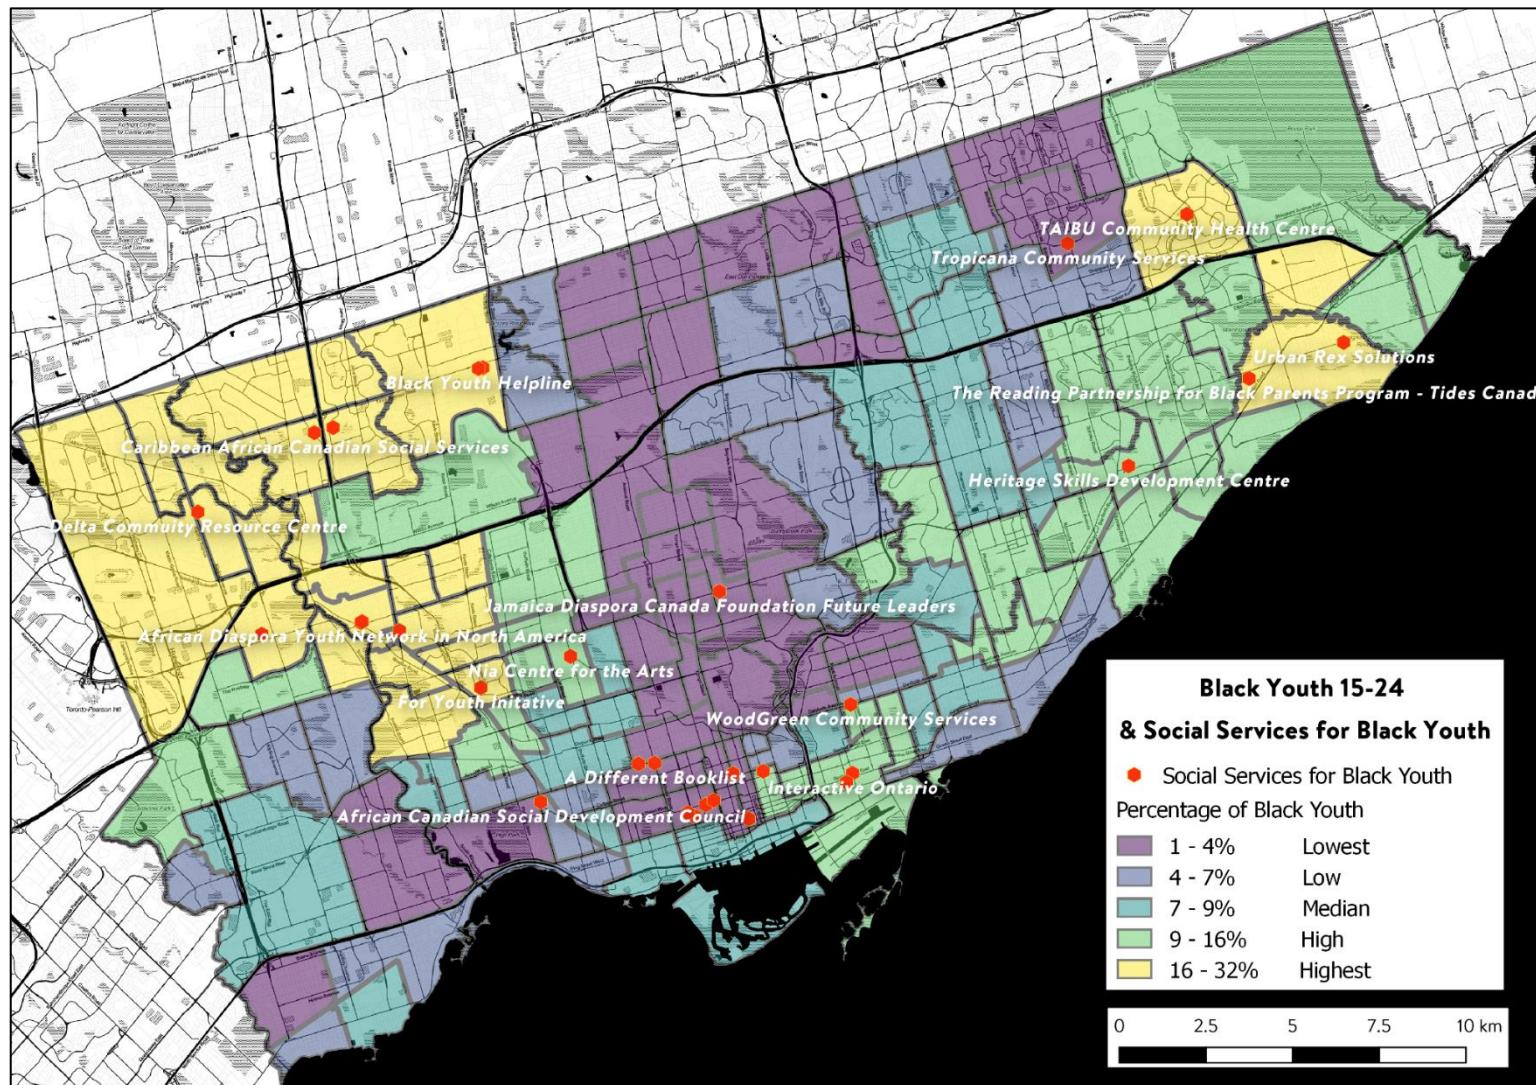

Figure 10: Asset map of social services for Black Youth across Toronto neighbourhoods by the percentage of Black youth age 15-24. Data visualization illustrates that while some organizations that offer social services to Black youth in areas where the highest number of Black youth age 15-24 reside, the majority of social services that provide specialized programming for this same population which are situated in downtown Toronto neighbourhoods, are located where the lowest numbers of Black youth reside. Data drawn from the 2016 Statistics Canada Census. Data calculated to fit City of Toronto neighbourhoods by James Borland, YouthREX, York University, Toronto, Ontario, Canada.

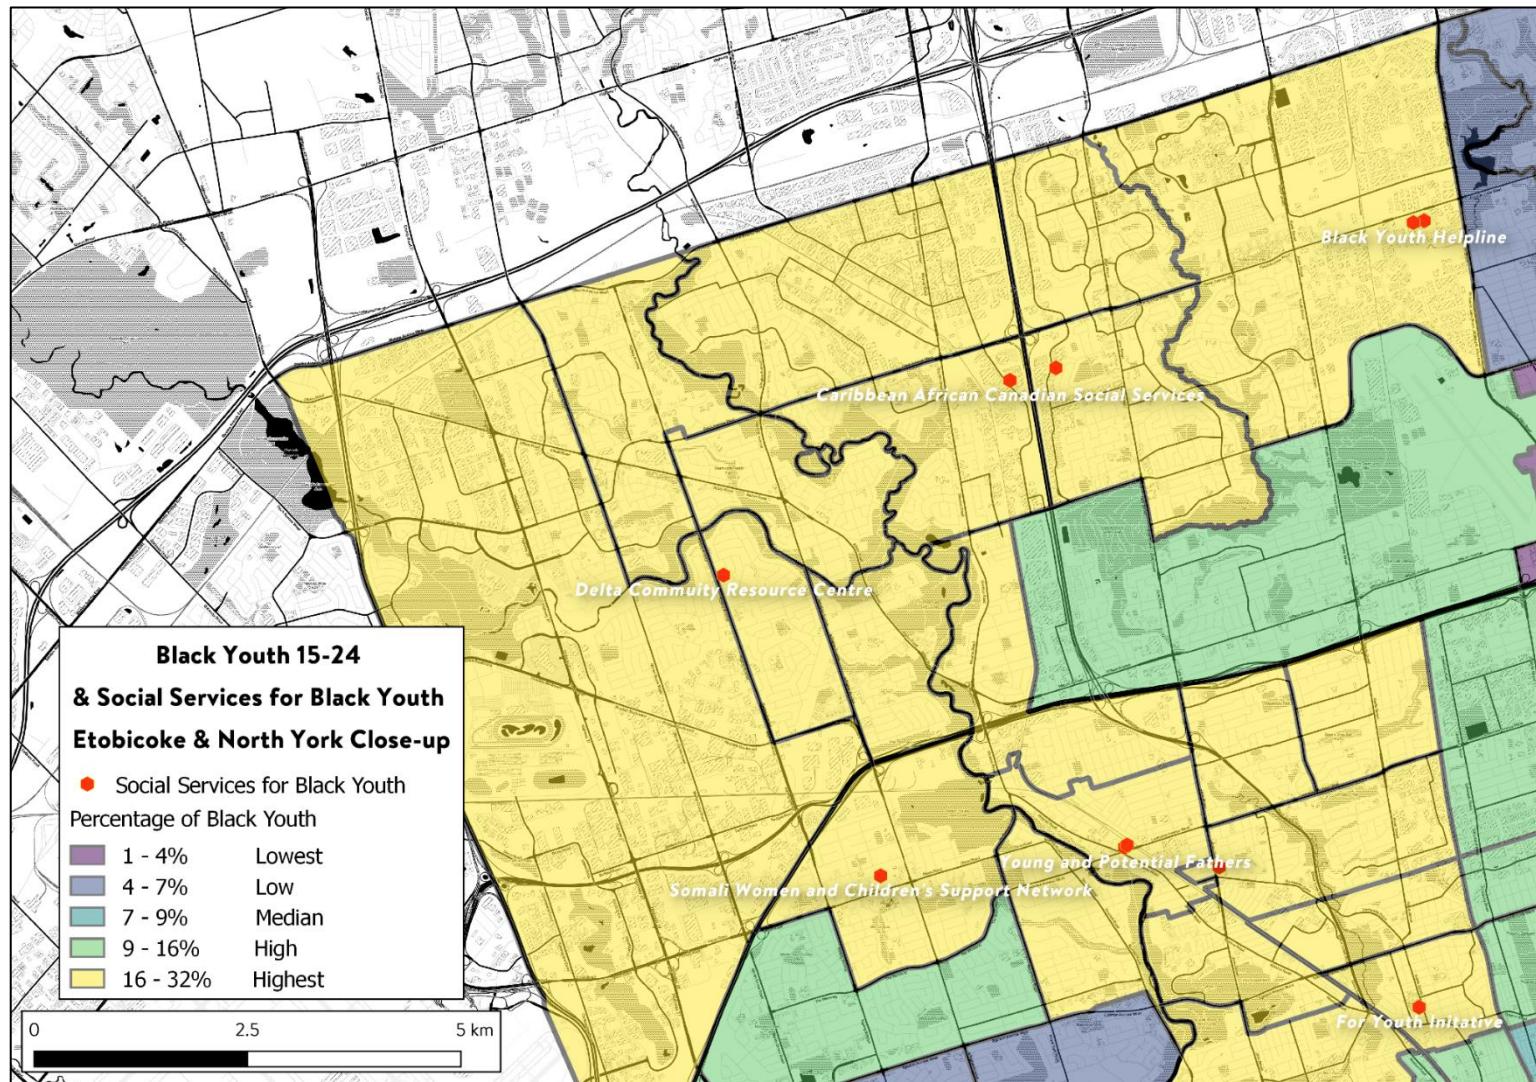

Figure 11: Asset map of social services for Black Youth across Etobicoke & North York Toronto neighbourhoods by the percentage of Black youth age 15-24. Data visualization illustrates that organizations that offer social services to Black youth in these areas are located in neighbourhoods with the highest numbers of Black youth residents. Data drawn from the 2016 Statistics Canada Census. Data calculated to fit City of Toronto neighbourhoods by James Borland, YouthREX, York University, Toronto, Ontario, Canada.

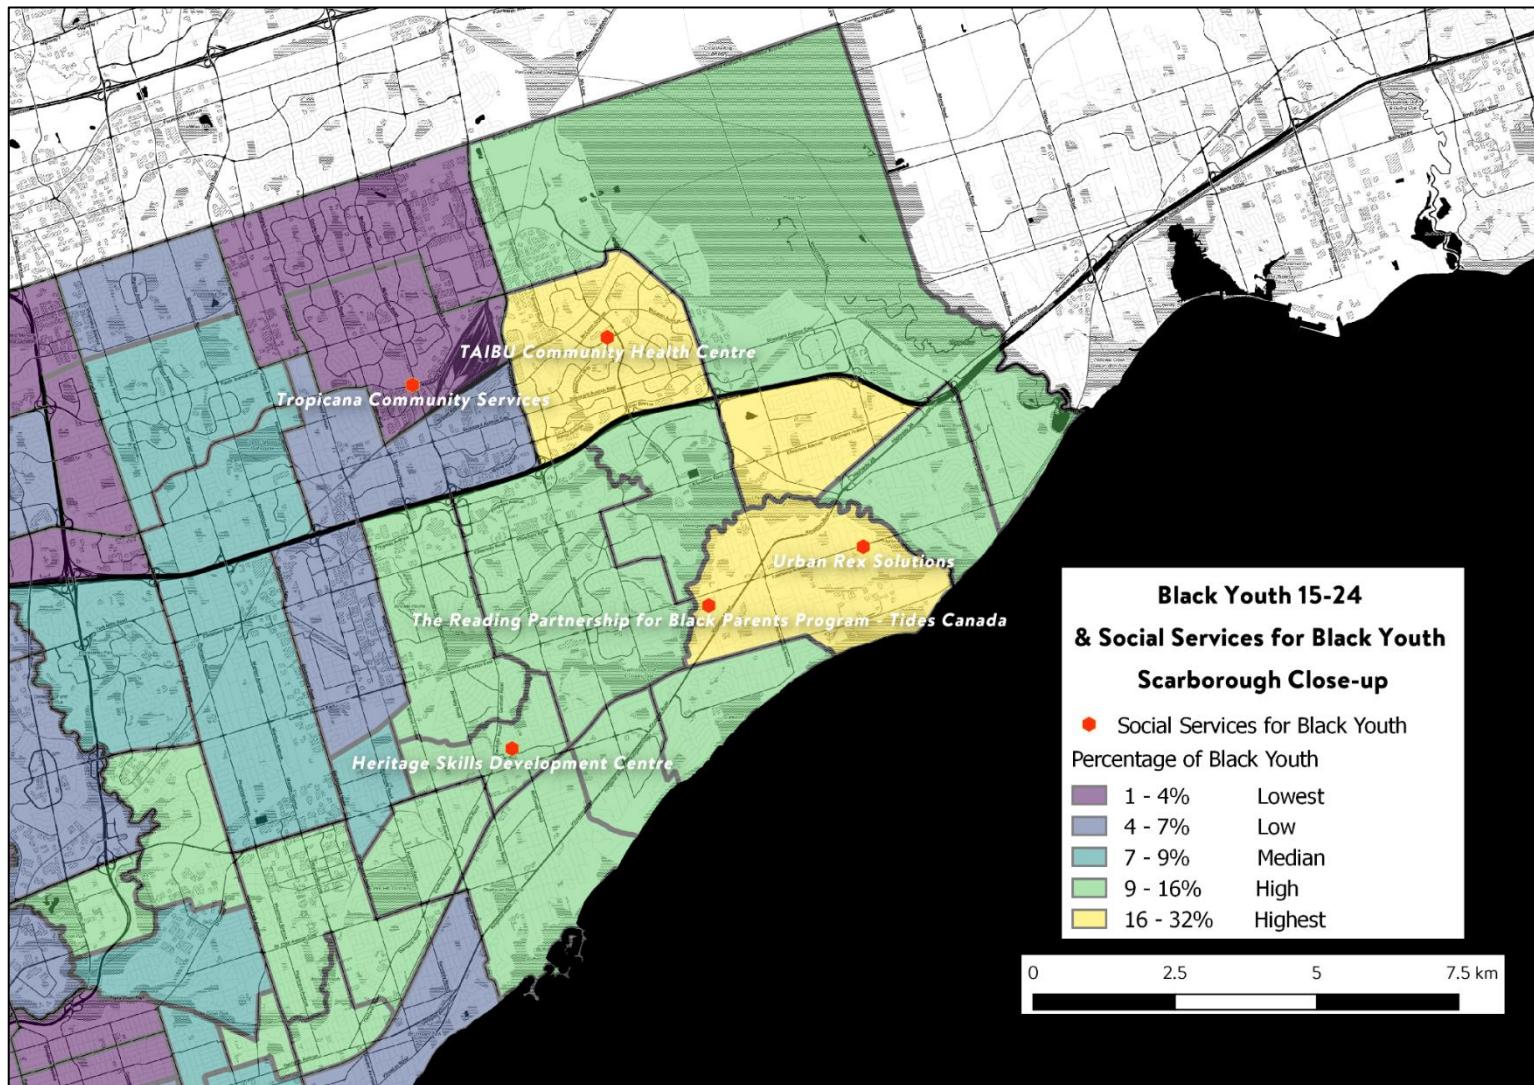

Figure 12: Asset map of social services for Black Youth across Scarborough Toronto neighbourhoods by the percentage of Black youth age 15-24. Data visualization illustrates that most organizations that provide social services for Black youth in this area are located in neighbourhoods where high and the highest numbers of Black youth reside. Data drawn from the 2016 Statistics Canada Census. Data calculated to fit City of Toronto neighbourhoods by James Borland, YouthREX, York University, Toronto, Ontario, Canada.

Figure 13: Asset map of social services for Black Youth across Downtown Toronto neighbourhoods by the percentage of Black youth age 15-24. Data visualization illustrates that most organizations that offer social services to Black youth in these areas are located in neighbourhoods where the lowest numbers of Black youth reside. Data drawn from the 2016 Statistics Canada Census. Data calculated to fit City of Toronto neighbourhoods by James Borland, YouthREX, York University, Toronto, Ontario, Canada.
